# CUSTOMER'S HAPPY STORIES

★★★★★ Love my F22

I was very impressed with the machine. It does not have all the bells and whistles other entry level machines may have this one will just tell you yes there is something in the ground. Single tone with a good pre-set volume so it can be heard in a noisy area (did not notice headphone jack) also there is no volume control. This is a true turn on and go machine. Easy to put together and take apart for storage. It does not go very deep but let's face it most children are not going to want to dig a six inch hole for a penny. I was getting about two to three inches in depth which in my opinion is

good for a young child at which this machine is made for.

★★★★★ 7 year old son found gold a ring in the first hole he dug 3 inches deep with this detector

I just felt that I need to share this story and I am sure many won't believe it. I should have asked my son what lottery numbers to pick yesterday. His RM Ricomax metal detector had just been delivered and I helped him assemble it and set it to the right settings. I was upstairs working and saw him out my window digging in a hole in my front yard. He was at it for about 20 minutes since the generic carrot pinpointer I have is not super precise. Next thing I know he yells out, "I found a ring! I found a gold ring!". Of course I thought that there was no way. I go downstairs and he comes running in the house with a dirty gold ring. I still didn't believe it and figured it was brass or junk but at a closer look it had a 24k marking on it. My jaw hit the floor. It weighed in at about 6g. I just wish I would have video recorded his first dig as it would have been awesome to get find and that reaction on video. I still can't believe it and he was on cloud 9 and is still there. Anyway, I feel like this story speaks for itself as a review, The RM Ricomax is light and easy to use. It is nice that it also has a pinpoint feature built in to help narrow down a find. I would recommend it to anyone.
